Dear Parents

2nd December 2015

I found out yesterday that the MUGA contractors, who have made such good progress on clearing the wooded area, want to start on preparing the access route from their compound in the wooded area to the field sooner than they had anticipated. Their access route goes over the stage, wild area, astro turf and garden area. This work will now start after the children have left school this afternoon.

I have been assured that the PTA will still have full access to the field for an activity there as part of our Christmas Fair. The contractors are going to roll up the astro turf as they remove it, keep the logs for the children to play on and also I will ask them to carefully remove the stage backdrop.

Today in assembly the children were told about these changes as well as taking time to think about the exciting times we will all have enjoying and playing on the new MUGA. Children have all had an opportunity to write or draw their memories, the school councilors have taken photos of children enjoying playing in these area and everyone has enjoyed some extra playtime playing out there.

The clubs that use the outdoors, whether it's the field or the playground are very aware of these changes and they will use the playground for their activity and only going inside if it's too wet to be outside.

It is exciting to see the progress the contractors are making.

Kind regards
Frances
